Description

This project stores the source code for the Hartebeespoort Practical Shooting Club(HPSC) website (<https://hpsc.co.za>).

Summary

This project stores the source code for the Hartebeespoort Practical Shooting Club (HPSC) website (<https://hpsc.co.za>).

It is a React project bootstrapped using Vite with the TypeScript React template. It is written in TypeScript and uses Bootstrap and React Bootstrap as the UI framework. It uses React Router for page routing.

Repository

The repository for this project is located at [GitHub](#).

Feature requests, suggestions for improvements and bugs can be logged using the project's [Issues](#) page.

An overview of the project can be found at <https://tahoni.info/projects/hpsc-web-vite>.

Structure

A high-level structure of the project.

Technology

A list of the technology used to develop and/or run the project.

Languages:

- TypeScript 5

- HTML 5

- CSS 3

Build Tools:

- npm

Frameworks:

- Vite 4

- React 18

Libraries:

- Bootstrap 5

- React Bootstrap 2

- React Router 6

Instructions

In the project directory, you can run:

▶ `npm run dev`

Runs the app in the development mode.

The page will reload if you make edits.

▶ `npm run build`

Builds the app for production to the `dist` folder.

Your app is ready to be deployed!

▶ `npm run preview`

Previews the app in the `dist` folder locally.

It's an easy way to check if the production build looks OK in your local environment.
